SUMMARY

Software Engineer with hands-on experience building production-style web applications across frontend, backend, and full-stack workflows. **Worked with React, TypeScript, Laravel, Livewire, Next.js, REST APIs, PostgreSQL, Firebase, and Java-based systems.** Strong in turning requirements into maintainable product features, secure data flows, role-based access, integrations, and polished user experiences. Interested in software engineering roles where product thinking and modern AI-assisted development can create measurable impact.

EDUCATION

Universiti Teknologi Malaysia (UTM), Johor Bahru, Malaysia

Bachelor of Computer Science (Software Engineering) | Oct 2020 - Jul 2025 | CGPA: 3.59/4.00

WORK EXPERIENCE

Gates Technology Sdn. Bhd. / MyPATIL, Malaysia (Remote Contract)

Full-Stack Developer | Sep 2025 - Apr 2026

- Built and maintained Laravel and Livewire modules for user management, menu configuration, knowledge base content, ticketing, enumerations, and operational workflows.
- Implemented role-aware interfaces, CRUD workflows, data tables, dependent fields, validation rules, and PostgreSQL-backed data handling across multiple modules.
- Worked with Laravel, Blade, Livewire, Eloquent, PostgreSQL, Redis, Git, and REST-style backend integration while resolving production-like UI, database, and deployment issues.
- Collaborated remotely with product, DevOps, and development teammates using Git branches, code reviews, issue tracking, and iterative delivery workflows.

WeCodeForYou.io, Cairo, Egypt (Hybrid)

Frontend Developer Intern | Aug 2024 - Feb 2025

- Built and improved React and TypeScript features for a social and e-commerce platform, including product pages, cart and checkout flows, wishlists, orders, storefronts, settings, and reporting screens.
- Integrated frontend components with backend APIs and handled forms, validation, state, loading and error states, and responsive UI behavior.
- Resolved practical issues including hydration mismatches, product-edit blocking, long-caption handling, input validation, and support-message errors.
- Worked with React, TypeScript, Vite, Tailwind CSS, React Hook Form, Zod, Zustand, React Query, shadcn/ui, Postman, Jira, and Git.

RELEVANT PROJECTS

CodeProof - Evidence-Based Developer Hiring Intelligence

- Co-built and deployed a bilingual, mobile-responsive developer hiring intelligence platform that converts CVs and public GitHub repositories into evidence-backed candidate profiles, source-grounded technical interview prompts, and recruiter hiring insights.
- Engineered a secure, API-independent analysis pipeline for PDF CV extraction, GitHub project discovery, bounded repository ingestion, technology/architecture detection, and file-grounded skill evidence; integrated authentication, candidate persistence, Arabic RTL, and responsive recruiter analytics.

EduComm - Academic Communication Platform

- Designed and delivered a full-stack platform for student and lecturer communication with role-based registration, protected routes, profile management, real-time messaging, and multilingual chat translation.
- Built with React, TypeScript, Firebase Authentication, Firestore, and a Next.js API layer; implemented validation, username checks, JWT-protected requests, and role-based permissions.

CERTIFICATIONS

AWS Academy Cloud Foundations | Elements of AI for Business | IELTS Overall Band 7.5

SKILLS

- **Languages:** JavaScript, TypeScript, PHP, Java, Python, SQL, HTML/CSS, C++.
- **Frameworks and libraries:** Laravel, Livewire, React, Next.js, Vite, Tailwind CSS, Spring Boot, Firebase.
- **Databases and tools:** PostgreSQL, MySQL, Firestore, Redis, Git, GitHub, Docker, Postman, CI/CD, Jira.
- **Engineering practices:** REST APIs, authentication, RBAC, validation, responsive UI, debugging, Agile/Scrum, testing, documentation.
