Education

Bachelor of Software Engineering
Universiti Teknologi Malaysia
📅 Oct 2020 – Jul 2025
📍 Johor Bahru – Malaysia

SKILLS

Development Frameworks

- React.js, Spring Boot, Next.js, Tailwind CSS, Laravel, Flutter.

Programming Languages

- Java, JavaScript, TypeScript, PHP, C++, Python, SQL, HTML, CSS.

Tools

- Docker, Git Version Control, CI/CD, VS Code, Postman, MySQL, Firebase.

Methodologies

- Agile, Scrum, REST APIs, Microservices, Debugging, Problem-

CERTIFICATIONS

- AWS Academy Cloud Foundations
- IELTS – Overall Band 7.5
- CGPA Appreciation – 3.6/4.0

CAREER OBJECTIVE

Full Stack Developer with hands-on experience building enterprise web applications using React, Laravel, and RESTful APIs across teams in Egypt, Malaysia, and The US. Proficient in Java and OOP principles, with a track record of shipping features from design through deployment in Agile environments.

WORK EXPERIENCE

Frontend Developer

WeCodeForYou.io

📅 Aug 2024 - Feb 2025 📍 Hybrid / Cairo

- Developed responsive dashboards using React.js and TypeScript, contributing to a **30-person engineering team** serving a platform with **thousands of active users**.
- Integrated frontend components with backend APIs using React and TypeScript, resolving data inconsistencies and improving load performance across key user-facing modules.
- Optimized UI performance and accessibility, **reducing page load times by ~30%** across major browsers.
- Delivered features end-to-end within Agile/Scrum sprints, managing tasks through Jira and maintaining version history via Git across the full SDLC.
- Debugged and resolved cross-browser UI inconsistencies using browser dev tools, guaranteeing layout integrity across mobile, tablet, and desktop breakpoints.

Full-Stack Developer (Laravel)

MyPatil (Enterprise Operations Web System)

📅 Sep 2025 - April 2026 📍 Malaysia / Remote

- Developed and maintained Laravel modules supporting business operations, administrative processes, and user management for a **50+ person team across 8+ core system modules**.
- Conducted code reviews for a team of **5 developers**, maintaining **zero critical bugs** reaching production.
- Designed normalized relational database schemas in collaboration with the system architect, reducing data redundancy and ensuring structural integrity across the full data model using Laravel migrations and Eloquent relationships.
- Designed and implemented RESTful API routing architecture across 6 core modules, enforcing clean separation of concerns and standardized data contracts between services.

PROJECTS

EduComm (Final Year Project)

- Solo-designed and delivered a full-stack academic platform for student and lecturer roles, built on React, Next.js, and Firebase following MVC architecture, **documented across 300+ pages of technical specifications**.
- Integrated LibreTranslate API for real-time multilingual chat translation and engineered role-based access control distinguishing student and lecturer permissions across all platform modules.
- Validated system through structured black box testing and UAT with real academic users, resulting in zero critical defects at release

IPRK Carbon Monitoring System

- Built a full-stack enterprise web application using Java Servlets/JSP following MVC architecture for the Iskandar Puteri City Council
- Designed and implemented role-based access control for three actor types: Resident, MBIP Staff, and Developer
- Developed modules for carbon emission data submission, management, and real-time GHG analysis with GIS/Map API integration
- Designed relational database schemas to handle multi-sector environmental data including water, energy, recycling, and waste inputs
- Implemented secure user authentication including OTP verification and Google OAuth sign-in
